At this time, AHCCCS cannot identify any reason an 837 Encounter Transaction (dental, institutional or professional) submitted would ever contain Patient Details. As a result, an edit has been created in the Translation Software that will reject the entire interchange should the Patient Hierarchical Level be present on a Transaction.

The presence of an HL Loop with "23" in HL03 (Hierarchical Level Code, 23 = Dependent), the following 824 will be returned:

Example:

```
